## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-14 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: claims 1 and 12 recite, inter alia, "detecting a charging current at different points on a time axis, the charging current being based on charges stored in the capacitors by charging, detecting a discharge current from the capacitors after discharging, and determining whether or not each of the pixel drive cells has a defect, based on the charging current detected at the different points and the discharge current." In addition, the above limitations different than other LCD charge detections is that if the detection timing varies for characteristics of the waveform of the inspection current based on the charge stored in the capacitor of each pixel, there may be a case where a normal pixel is erroneously determined to have a defect.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations. Although Takahashi et al. (U.S. 5,539,326) disclose a Method for testing the wiring or state of a liquid crystal display and thin film transistor and Takahashi et al. (U.S. 5,428,300) disclose a Method and apparatus for testing TFT-LCD, they do not disclose the above-mentioned limitations.

### Conclusion

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
